Tapur Player is intended to be used in two different ways: As a stand alone player, to stream the files you have created. It also allows you to convert media files to the required format. As an application that runs in your operating system, to open media files you have created. Tapur Cleaner is a tool to help you clean up your local disk. For example, remove temporary files, temporary folders, junk files and other items that may take up space. Tapur Cleaner is more than a standard file cleaner; it can also optimize system registry. After cleaning the system registry, Tapur Cleaner can also help prevent problems from occurring. It is an application, which will scan your computer for specific items that get in the way of optimizing the system registry and can help you remove them. It includes a simple interface to quickly clean those items, and provide a detailed cleaning report. Tapur Cleaner does NOT attempt to fix the found items. Instead, it will simply remove them so they do not get in the way of registry optimization any more.
