Desktop Customizer allows you to personalize your computer. It has a simple GUI and shows all possible settings for you to change. It can create a document in a zip archive to easily save and load your changes. Folder Customiser Crack Mac is a lightweight and portable application that gives you the possibility to change the appearance of directories. It comes in handy for all users who are continuously looking for ways to personalize their operating system. How to set it up After picking the folder you want to customize, you can open it and select the "Customize this folder" option from the "View" menu in Windows Explorer. Once you've chosen the "Create or edit an HTML document" setting, you can proceed to the next steps to close the wizard, launch Folder Customiser, and configure settings. Simple GUI and customization options It's wrapped in a single window with a simple design and layout, revealing all options provided by this tool. You can change the folder's font style and color, together with the title and information text size. Moreover, you can assign a local WAV track as the directory's sound effect and loop it, as well as set background and line images, together with the directory's description. In order to commit changes, it's necessary to overwrite the "Folder.htt" from the target directory. Portable application The entire program's packed in a single.exe file that can be saved anywhere on the disk or copied to a removable storage unit to directly launch it on any PC without setup. It doesn't have any dependencies or make any changes to your system registry. However, it auto-creates and updates an.ini file to remember your settings. Evaluation and conclusion It hasn't received updates for a long time and we've experienced compatibility issues on newer Window versions. On top of that, Folder Customiser is difficult to set up by casual users. Nevertheless, this program features helpful customization options for directories and it's free for non-commercial use. Gagaro - 2D Toon Animation Software Price: Free | Info Date Added: 11/17/2016 Introducing Gagaro Gagaro is an easy-to-use toon animation software that provides you with the tools to create cute toons by yourself. It makes creating cartoon characters fun, and you can even use it to draw sketch-style animation, which is a good starting point for animation students, artists, and designers. The tool includes two main modes: drawing and timeline. The drawing mode lets you draw individual characters and backgrounds, and you can then combine them in the timeline to create your cartoon. The timeline lets you connect your drawings with one another to create a story arc. Features Gagaro provides a slew of different drawing tools to create a cartoon character. You can draw the character from the head to the feet, and even use your tablet's eraser to make the body look more three-dimensional. You can also add background objects, such as trees or mountains, to create a more realistic scene. To draw the characters' facial features, you can use a set of various brushes, or you can draw them manually. There are also a few tools that let you draw quick animations. You can draw an animation frame by frame, or you can add key frames to draw a transition animation. You can also draw a skin that automatically scales and rotates your drawing. Additionally, you can add lighting effects and choose from a variety of movement presets. You can use Gagaro to make a cartoon character come to life. Just draw a base skeleton using one of the character templates, then use the timeline to add details to the character's body, such as muscle, hair, or facial expressions. You can even animate its head and hand motions. When you're ready, you can export your character and animation into Gagaro's timeline or picture exporting tool. You can save a toon character to your computer's hard drive, and you can even save animated toons to SD cards or Bluetooth devices, which lets you share your creations with other users. The software includes a file browser and organizer, along with powerful image editing tools. You can use Gagaro to add drawings or animations to a timeline. You can also add audio to a timeline and export the timeline to different file types. You can also add sounds to your timeline and export them to MP3, WAV, AVI, MP4, and GIF files
