You can use PDF to Text Converter Plus to extract text from PDF document, edit and modify text or to save the text into TXT, CSV or

What's New in the PDF Conversion Series - PDF2Htm?

PDF is the most widely used document format that works across different computer platforms and operating systems. Most PDF converter, search engines and ecommerce sites use this format. While the PDF format is widely used among technical folks, the majority of end users really do not know how to handle PDF files. These end users want to read on web sites exactly what they view on PDF files, that is, in a browser they view links, images, tables and charts. Very often, the end user also wants to add comments to a PDF file and to modify a particular PDF file. Finally, they want to publish the PDF file on web sites using web servers or mail servers. PDF Conversion Series - PDF2Htm will help you convert your PDF file to Html code so that you can: Search an internet site using your PDF file, just like you search a web site using an html file; Present your PDF file to your customers when your web site has been modified; Publish your PDF file to a web site so that they can read it in their web browser; Make your customers buy directly from you; Modify a PDF file such as with PDF Text, Tables, Graphics and so on. The PDF Conversion Series - PDF2Htm software will help you convert your PDF file to Html code. With PDF Conversion Series - PDF2Htm you can preserve the layout, links, images, tables and charts as well as vector graphics. PDF Conversion Series - PDF2Htm can easily convert every PDF file into Html code with or without login. It converts your PDF file to one continuous Html code with just a few clicks and very quickly. We guarantee that you can get exactly what you see in your PDF file. To get your first output, select any PDF file and open it with "PDF Conversion Series - PDF2Htm".
