Easy to use macro recorder for Microsoft Windows and Unix/Linux. Create simple or complex macros, record, play back, repeat. Send macro to clipboard, printer, windows, terminal or any other program. Automatically re-save macros when they are closed or quitted. RAMBOX Description: RAMBOX is a tool that analyses your system's RAM use and provides you with an overview of how much of it is currently in use. Set a configuration to scan your system for the areas with the most RAM usage. The program then shows you how much of each area is in use and lets you set a threshold (based on % of RAM) to filter out unused areas. This screen shot shows the settings for RAMBOX: Resource use - Automatic scans your system for areas with the most RAM usage. The program will report these areas in 3 sections (Cached Memory, Available Memory and Inactive Memory) and provide information on which are currently being used (the most used). High or Low - You can use this to monitor how the amount of RAM usage is increasing or decreasing. The report will provide you with a graph. Adjustable - You can use this to adjust the thresholds used to filter out unused RAM areas. Setting the thresholds is fairly intuitive and is the default configuration. You can also choose to view the percentages of RAM usage with the slider. Received on New Year's Eve 2005 and successfully released in 2007, QNAP aims to establish itself as a top virtualization software on the market. With the latest release, their ambition looks to be within reach. The latest build comes with several impressive innovations in comparison to the previous releases, which will surely provide the market with a new software that is perfect for those who need a fast, scalable and more secure network attached storage (NAS) solution. The software's support for QNAP appliances at the appliance level has been improved so that it is no longer just suitable for the network attached storage (NAS) category. It is now also supported by other product types, such as the file server. The latest version is able to integrate with devices such as the smart TV or Android-powered devices. QNAP is backed by a global team with over 20 years of combined experience in hardware and software. The new QNAP NVR software is capable of recording up to eight channels simultaneously from eight digital video cameras. The newly added program can automatically save the recordings to a HDD, the network or the cloud without 77a5ca646e
