## **Excel-Accelerator Crack+ Product Key Free [March-2022]**

KEYMACRO is a macro add-in for Microsoft Excel that helps you to create your own functions and macros with a simple, easy to use interface. Most macros are saved in .xla files. If you have more than one macro in the same workbook you have to save each one with a different name. LASTMACRO Description: LASTMACRO is a macro add-in for Microsoft Excel that allows you to record any kind of actions you perform in the program on a keyboard shortcut. LastMACRO also allows you to write your own macros for programs other than Excel. LASTSPACE Description: LASTSPACE is a macro add-in for Microsoft Excel that allows you to replace the content of a cell with a space (or any other character) after filling a cell. For example, if a cell is empty and you press F2, it will be replaced with the word "Value" and you will be able to press Enter to continue. MICROBIT Description: MICROBIT is a macro add-in for Microsoft Excel that allows you to select a certain range of cells in the workbook and it will build a macro to use that range of cells later. MSDB Description: MSDB is a macro add-in for Microsoft Excel that allows you to create a database. You can choose between two modes: INSERT to add records to the database and DELETE to delete records from the database. You can also create a new database by choosing the NEW option. You can use MSDB as a tool to organize and manage your data. OCULUS COMMONSPACE Description: OCULUS COMMONSPACE is a macro add-in for Microsoft Excel that allows you to use a template cell in your spread sheets. The template cell is used to group and format data from different sheets, so you can perform operations on them easily. PERMISSIONER Description: PERMISSIONER is a macro add-in for Microsoft Excel that allows you to create formulas that you can use to manage the permissions in a workbook. The macro is very simple and it is very easy to use. QUESTION Tools Description: QUESTION Tools is a macro add-in for Microsoft Excel that allows you to record any kind of actions you perform in the program on a keyboard shortcut. Most macros are saved in .xla files. If you have more than one macro in the same workbook you have to save each one with 1d6a3396d6
