Q: How can I make a search query for type column? I want to search my type column by typing any words. For example: If I type "cat" it should give me all cat records. A: The title of your question is not clear. If you want a search engine that can do full text search over whole tables (and assuming appropriate indexes of course) then you'd be looking at ElasticSearch or Lucene, as database-backed search providers don't have a concept of full-text search. Most RDBMS like MySQL provide 'Like' search functionality for full-text search - this can often be done with one query, but it depends on the data you're searching. Example: SELECT * FROM table WHERE MATCH(col_name) AGAINST ('search_text') If you don 3e33713323
