AutoCAD Product Key also includes a client-server architecture, allowing users to use the application on a server, over the Internet, or from a client on another computer. The server-client architecture allows a user to work from remote or mobile devices, as long as the Internet connection is available. Autodesk released

the AutoCAD 2014 and AutoCAD LT 14.0 update on February 12, 2014. The User Interface has been modernized, and provides touch and pen capability, for tablet PCs and smartphones. A new user interface (UI) has been introduced in AutoCAD 2013, followed by AutoCAD LT 2013 and

AutoCAD Web Connect for iPad (formerly called CADonAuto), AutoCAD 2012, AutoCAD 2010, AutoCAD 2009, AutoCAD 2008, and AutoCAD LT 2008. New features In 2013 and 2014, AutoCAD introduced the following new features: New modeling and rendering engine In 2013 and 2014,

Autodesk used a new rendering engine to enhance model features such as trusses, stop-lines, fence posts and turntables. The new rendering engine offers better performance and accuracy for more complex drawings and has increased ability to control output to Adobe Photoshop or Illustrator, adding to

features available in AutoCAD 2011. Ability to embed or create PDF reports and CADX objects In 2013, AutoCAD introduced PDF reports and CADX (3D) (formerly Dynamic Modeling) objects, allowing users to create and embed PDF reports, CADX objects, and CADXML files in a

drawing. PDF reports can be used as a way of communicating with others and as a quick communication tool for CADX objects. Improvements in handling of DXF files In 2013 and 2014, AutoCAD introduced the following improvements in the DXF (Drawing Exchange Format) drawing

format: Clipping masks for each object AutoCAD 2013 introduced the ability to define a clipping mask for each object in a drawing. AutoCAD LT users are able to define a clipping mask for each layer in a drawing. This feature allows designers to create assembly drawings that clearly define how parts fit into the final

assembly. New geo and more In 2013, Autodesk introduced a more intelligent approach to components that improves editability. The new component features include geo, more infographics, attribute attributes, and two-point-measure (2PM) which a1d647c40b
