Search and replace across drawings and easily transfer feedback from one drawing to another. Leverage new search and replace tools to find and replace text or numbers in drawings and markups.

Import Color Tags, Colors, and Text Styles from a XML data source, including Excel, PowerPoint, CSV, and Google Spreadsheet. Color Palettes: Store colors as collections in a color palette, such as “Monochrome” and “Elements,” to use in your drawings. Create your own color palettes by combining colors in any number of ways. Create Custom Palettes with Ready-Made Color Sets. Save and Share Presets: Save and share custom palettes, add-on modules, and data by

using a preset with an annotated value set. Go to “file” > “save as.” (video: 1:53 min.) Save colors in a single set by creating a palette with a “Name” and “Value” field. You can then save a copy of the palette with one value and change the value of the palette to change the colors within the palette. Manage and organize your presets in the Presets Manager. Smart Guides: Add intelligent, visual guides to your drawings. Draw smart, highly detailed guides around

objects or connect to existing 3D elements to show more accurately how your drawings look in real life. (video: 2:53 min.) Apply and Save Guideline Preferences. (video: 2:30 min.) Automatic dimensioning and accurate centerlines: See dimensions in drawings with automatic dimensioning and centered, text-alignment text. Automatically snap to geometry or create a spline dimension to get a precise, readable dimension, if you choose. Advanced Symbols: Create

symbols that represent your design, create composite symbols that combine two other symbols, and use symbols in annotative text. (video: 1:53 min.) Use pre-defined symbols in drawings and in annotation. (video: 2:40 min.) Apply the symbol to a text style. (video: 2:18 min.)

Access dynamic attributes and symbol properties: Adjust attributes for multiple objects in a single symbol, such as width or height, apply a dynamic attribute to the entire symbol, or change an attribute for

all symbols.
