The central fact of our being is that we are made in the image of God. This original image, restored to us by the cross, will cause us to love God, our God, according to His unchangeable and immutable will, and will thus do what in us is of nature to do. Let us pray. Almighty God, who sent the spirit of Jesus into our hearts, to govern us by His laws, and to make us happy in this world, and in that which is to come: Grant that we may both see and feel the continual presence of Jesus in our hearts; and, so seeing and feeling Him there, may love Him as our own nature, and as our reason, is led to love; through the same Jesus Christ our Lord, who with you and the Father, and the Holy Spirit, live and reign, one God, now and for ever. Amen.//

What's New in the AutoCAD?

: Create designs with alternate input interfaces or markup languages—support for Chinese Traditional, Japanese Kana, or Korean Hangeul characters. (video: 1:30 min.) Checkbox Tools: Use checkboxes to add visibility settings that can be applied globally or for an entire drawing or a block. Orientation Tools: Change the orientation of an object on the layout or place view of a block or drawing, which is useful for laying out in landscape or portrait orientations. Frame Tools: Use frames to create simple 2D drawings. Create textured and colored lines that can span multiple frames. Misc Tools: Easily define and share library objects by defining reusable dimensions. Command-line Support for command-line arguments. AutoLayout, Viewports, and Other View Improvements: Drag and drop to adjust the aspect ratio of a view. Can be done on a view and saved to a layout that will apply to all views. Revert to a previous view when going to the next or previous view in a drawing. Set various margins from the command line. Refresh and run dialogs are persistent to the session. Goto command now works to navigate from a 2D object to a 3D object in the same drawing. Dynamic Reordering of Views in Blocks: Choose a layout for a block, and the blocks that follow will automatically take that layout. (See Navigating views in blocks on page 7.) Drag and drop to rearrange views in a block, similar to the behavior of the Collections tab in Microsoft Excel. Support for Secondary Layouts: Secondary layouts can be applied to blocks and drawings, and they share the layout with the primary layout. Secondary layouts in blocks can change the block size. Pin and Unpin Display Options: Users can now set pin and unpin options from the toolbars or the command line. Print options: Configure printers on the command line to output to PDF, PostScript, or Direct Print. Layout Options: Customizable options for the appearance of the drawing: specify the font, orientation, and margins in your drawing. (See also page 81.) Preference changes for drawing: Specify the default units, local coordinate system, precision, scale, and grid scale for a drawing. (
