A History-Making Fantasy Action RPG. Open World Fantasy Action RPG. The Elden Ring is based on the fantasy novel, "The Elden Ring," by Yasutaka Tsutsui. Traces of the occult sciences The Story of the Elden Ring began several thousand years ago in a time when kingdoms were established. At that time, the frontier between the world of human beings and the unknown world existed. At that time, out of the ruins of a holy kingdom, a "great and ancient science" of the occult was discovered. What is this science called, and what does the world it created mean to us? Our story begins when this science was passed on from the previous world to ours. At this point, the history begins that we all know today. The tragic story of that history is the main theme of the Elden Ring story. What is the Mind of Fantasy? Elden Ring is a fantasy action RPG developed by the legendary RPG developer CyberConnect2. With Elden Ring, we are fully determined to create a fantasy action RPG unlike any other. As the developer of the legendary Xenogears, Sega Rally, and Panzer Dragoon, CyberConnect2 has accumulated its own rich experience that leads to this goal. One of the things that we feel an action RPG needs to aim for is an emotional connection, such as the enjoyment of defeating monsters. While there are other fantasy action RPGs, none of them understand the reason to be in a fantasy world and the immersion of this world, and none of them have an emotional connection to this world. In the spirit of the Xenogears, CyberConnect2 believes that the world of the

Nine strains of Alkaliphilic Enterobacter species isolated from soil and a textile product were studied for their ability to degrade gossypol and their ability to enhance plant growth under stress conditions. Three isolates degraded gossypol with 75-100% reduction within 8h incubation and with 100% at 96h. Performance of remediation of mixed gossypol and cotton seed with gossypol degrading Enterobacter species is confirmed. While two isolates enhanced plant growth in the presence of gossypol, one of the strains also showed some growth at 2 g/L of gossypol. Both isolates, which are most sensitive to gossypol, also showed some potential for dye remediation. of the

☐☐☐ Action RPG CELLS THE CELLS OF THE UNCONTROLLED VS SEEM AND DESTROY! Exiled from your own world, you come to a different world where there are uncontrollable creatures, and the seemingly innocent and carefree Fress Pirek— who has only just landed on Earth— becomes your shadow from the shadows, “The World of the Wild Child.” The central dramatic events that occur in the captivating story of the world’s fate, as well as the deepest mysteries of the world, will please everyone.

- Enjoy a Drama That Proves Transcendent The story is presented in a two-dimensional sense, but as a live action game, not a film, it is a drama that conveys emotions through various scenes.
- Enjoy a Fantasy Adventure with a Compelling Story In the world of the game, where a mysterious fate is waiting to be awakened, whose path leads to various places, you play with freely appearing characters to create your own tale.
- Enjoy a Drama with a Mist-Shrouded History In the world of the game, a drama with seemingly innocent and carefree Fress Pirek, who has just landed on Earth, is being played.
- Explore an Enchanting World The world of the game is still being revealed. There are many places and people with a mysterious fate waiting to be awakened and various unbelievable circumstances. FRESS PIREK Unlikely Ally, the Kid of the Land of the Wild Child He is the protagonist in the story of a drama that has not yet been revealed. From the early stage of the drama, he boldly takes his own decision. And in the end, he fights to stand on his own feet. In the absence of a heroic story, he is the only hero.

Clinical and radiological correlation of phenylketonuria and simplex enuresis in males. Single-institution, retrospective analysis of male patients with phenylketonuria (PKU) (group 1), simplex enuresis (group 2) and only enuresis (group 3), were studied for clinical and radiological parameters including serum tryptophan (Ser T), plasma tyrosine (PTA) and urinary free testosterone (UFT). In group 1, Ser T and PTA were significantly lower than group 3. UFT was significantly lower than in group 2 ($P = 0.01$), but not significantly lower than in group 3. In group 1, Wechsler Adult Intelligence Scale, Verbal IQ and Performance IQ were significantly lower than in group 2 and group 3. In group 1, Wechsler Preschool and Primary Scale of Intelligence tests showed no significant difference from group 2. In group 2, pencil and paper drawing (PAS) tests demonstrated an average of approximately 38% of the ability in age-matched subjects. This was significantly lower than other groups ($P < 0.05$). Internal and lateral sphenoid height were significantly smaller, and Woltman's and Woltman-Bimler's measurements were significantly longer in groups 1 and 2 compared to group 3. MRI revealed a volume loss of up to 54%, and particularly a reduction in cerebellar cortex and white matter areas with a large loss of volume. The neuropsychological performance was poor in group 1, and there were no
