A new footballing intelligence system called "FUT AI" has also been implemented into FIFA 22. Developed in conjunction with FIFA data scientists, it incorporates player intelligence and interpretation of all possible strategic elements to make the match more tactically exciting. FIFA 22 will also feature the newly launched Ultimate Team, a way to assemble and play with any players and teams from around the world in solo and online matches. The Ultimate Team will include "acquisitions" - special players that are bundled together. FIFA 20 was the first game in the series to receive a "Gold" ESRB rating. This will be the first FIFA title to receive a "Gold" rating since FIFA 12. The EA Access demo of FIFA 20 was also at E3. For more information on FIFA, visit: www.fifagame.com. FIFA 20 will be available later this year exclusively for the Xbox One computer entertainment system and Windows PC via Origin.WSJ: Obama administration seeks use of military in border operations The Obama administration is seeking to expand the authority of the military to bolster security along the U.S.-Mexico border by using the military as a first response force or backup force in its operations, according to documents obtained by The Wall Street Journal. The plan, which was developed as a contingency plan, calls for the U.S. military to support agents from U.S. Customs and Border Protection during a crisis on the southern border in a way similar to the role the Department of Homeland Security plays in protecting civil aviation, according to people familiar with the plan. The plan was developed by administration officials at DHS and discussions about the plan were held in late August with members of Congress and the Department of Defense, according to the people familiar with the plan. The documents provide details of a legal authority granted to federal agents after a person is arrested for a crime and, in some cases, after a person's ship has entered U.S. waters, according to a copy of the proposal obtained by the Journal. Previously, Customs and Border Protection agents were only authorized to use force during an arrest or to protect the ship from an imminent risk of illegal entry. The proposal provides a legal justification to protect ships carrying immigrants and grants the authority to use military personnel to respond to such an operation. The proposal was drawn up to provide as much protection to migrants as possible under the law. A Pentagon

FIFA (acronym for "Fédération Internationale de Football Association") is the world's leading football video game. It has sold over 61 million units since its debut in 1991, and is the best-selling sports video game of all time. The FIFA franchise launched its 21st game in October 2013, featuring improved animations and gameplay, among other improvements. EA Sports introduced fresh faces for the game's various modes, while the user interface received an overhaul, and new features such as the Ultimate Team mode and a revamped FIFA Ultimate Stars were added. FIFA 21 also featured a new EA SPORTS™ FIFA Club UEFA Leagues, including the UEFA Champions League and UEFA Europa League, and was the first game in the series to include a feature that allowed players to manage Club teams as well as their international teams. The title also received five awards at the 40th annual Interactive Achievement Awards, including the Excellence in Game Design award for "FIFA 21".

Gameplay The game receives frequent updates on the Xbox One, PlayStation 4 and PC platforms, and EA has announced that there will be similar updates for next-generation consoles. EA also stated that FIFA 21 will be the first FIFA title to be released on the Xbox One and PlayStation 4. Unlike the previous installment of the series, FIFA 21 does not have a new name, but focuses on the new year of 2014, and the anniversary of the franchise's release. The game includes several significant changes in both its gameplay and AI, including both new and updated gameplay mechanics and new elements, such as player individuality. Football simulation "Powered by Football" is the tagline of this year's game, which EA Sports announced on January 23, 2014. It focuses on the current gameplay mechanics, while remaining faithful to its previous titles, as well as the core of football simulation. The new engine, codenamed "Apex", allows development of the game more quickly and efficiently. A major change to the game is the introduction of a limited 3D character model (in comparison to the computer-generated "player") for the ball, and several animations have been added and tweaked, including a new fall animation and a new ball kick animation. The player also has been given a head as well as a face, and players can now wear facial hair and wigs. There are over 75 action shots in the game, up from 50 in FIFA 20. In addition to changing the look of

Build and manage your Ultimate Team of 255 players and create and compete in 64 leagues, featuring over 1,000 real-world clubs. Earn coins, coins and coins from your friends, social media followers and players from your Ultimate Team to improve your squad and dominate the pitch.

Player Impact Engine - The second generation Player Impact Engine, powered by True Move, delivers more intense, more realistic and more rewarding gameplay thanks to a series of significant changes to the physics, ball control, ball impact and collisions. Players now stay closer to the ball, their natural instincts to chase down lost balls are much more sensitive, and all sorts of subtle but important changes have been made to how players move and react to the ball.

PUM - Pro-Udef Mode - Player and PUM focus on improving your ability to pass the ball and create and score goals. The new Pro-Udef Mode is specifically designed to focus on your ability to pass and create. From new assists that provide you with the ball before your player runs out of bounds, better movement control for your passes and more precise and varied DIs, this new pass-focused mode provides advanced passing drills to help you perfect your passing.

Better Crowds - FIFA 22 introduces over 50 new crowd reactions, including cheering players and fans in the stands, who react more realistically to goals and other events to make your games more engaging and authentic.

Friendly Matches - Fight against your friends and teammates in a series of 11 new online competitive modes, including "Party Mode," where you can experience the full FIFA atmosphere at your own friend's house. In "Invitation Match," you can battle against friends who have been invited over to their house to play FIFA to earn rewards. "Free Kick Panic" sees you in a free-kick situation where you have to score past an opponent or you'll fail - but if you can't score, you'll lose.

Features Brand New Player Animation - FIFA 22 introduces an all-new animation engine, featuring thousands of unique animations and realistic body language to make the best footballers in the world move and act just as they did in real life. This new animation system will change the way you play FIFA on both xbox one and PS4.
