Crusader Kings II is a 4X strategy MMORPG set in medieval Europe, where the actions of one person can change the fate of an empire. Forged with a new graphics engine, this standalone expansion is the definitive strategy experience of the legendary franchise. For the first time in a strategy game, manage trade routes, construct and manage fortifications, recruit armies and fleets, declare war, and play an all new full scale campaign. Hannibal: Rome Total War is a brutally deep, fully-featured and action-packed simulation of the Hannibalic Wars. It takes place in the footsteps of Carthage's greatest military commander, Hannibal, and his army of pikemen, fearsome elephants and African cavalry as they assault northern Italy and perform one of the greatest military feats in history. At its centre is a completely new campaign system, with six new playable Carthage factions, new playable army units from Gaul, Spain, Macedonia and more to bring an exciting new depth to the battlefield. The first real-time total war wargame, Hearts of Iron IV sets the stage for one of the most dramatic and intricate stories in military history. In this sequel to the huge success Hearts of Iron III, the player takes charge of either the Allies or the Axis in 1945, after the epic D-Day landings. Responsible for driving the forces of history, you will make decisions that will shape the fate of your nation,

and send them on a path to war and peace. God of War Ascension provides the first of a new trilogy of titles that will build on the award-winning gameplay introduced in the critically acclaimed God of War. Experience an epic tale of revenge, betrayal, and transformation. Set in the Greek underworld, the game focuses on Kratos, a Spartan warrior who is betrayed and stripped of his memory by Ares, the ruler of the underworld, and must seek revenge in order to restore his lost identity. The gameplay is loosely based on Greek and Norse myths about the underworld, war, and the consequences of actions. An innovative new game engine allows the player to capture, manipulate and reflect light, and use the environment to an unprecedented degree. This unique concept, inspired by the Penrose tiling, allows the player to interact with the elements of the environment, and the visual environment to interact with the game. Infiltrate the enemy lines, annihilate their defenses, and inflict catastrophic damage to their command centers as you command a team of highly skilled and special forces soldiers to

companions can help you fight the evil force that threatens to drag all wizardry back into the world. You can play as a male or female for the companions. When it comes to your own character, you can choose from several classes: Wizard, Cleric, Rogue, Fighter, Druid and Necromancer. Each class has its own points bonus. For example, the Wizard class has the most points, so he can do the most damage by casting spells. Also, you can choose which gender your character is. When your character is a character, you can chose to be an ally of the good or the evil. You can also buy items, each of which represents different purposes. For example, the Inventory is for carrying items. The Lab is to conduct experiments, and the Armory is to buy weapons. If you find yourself in need of some healing potions, which are a very rare item that can be bought in the Armory, or a wand to cast your magic, which can be bought in the Guildhall, you can open the Warehouse to buy them. ### What's new:

**: How uABuntu changed my life Hi there! So my name is Carol and I've been living with a type 1 diabetic for 18 years. I'm now at Sandrock where I've had an opportunity to live a whole new life. I like to write about my health and about my experiences with diabetes; I hope it helps the thousands of people like myself. I've come to realize what a blessing insulin is. When I first started thinking about it, I was not really interested. I haven't wanted to touch the pens, needles, doppler, etc. I have seen that if I don't take them for the right reasons, they can really hurt me. Here at Sandrock I have realized that in the past I haven't really appreciated what it is that I have and that my health is the most important thing that ever happened to me. I write these things mainly because it is important to me to not hide away from the truth and suffer in silence. I also hope that I can inspire others and let them have a bit of hope for a great future. I really love this place and I have found many friends here. The crew is great and I really can't believe I now understand more about diabetes and I see the benefit of it in my life. I'm not saying I have it solved or will never have problems, but I will be okay with the problems I do have if I recognize them and treat them with dignity. This is the biggest change for me and I see my life in a whole new light because of it. I hope that my brothers or sisters can take a look at these posts and that they might be able to get a little more insight and knowledge to help them in their road. I've been so thankful for my dad and my doctors for their incredible support. Also, thanks to Sandrock community for the extra insulin you share with me, sometimes I think I forget what a blessing that is! Thanks for being so kind! In the beginning: Once upon a time I was happily married, living in a city which I love. I was working at professional school as a government consultant and I still am! I was happy; I was exercising often to keep me strong and fit and I was basically living my life to its fullest. I was scared of one thing: diabetes. I worried a lot about it and I dreaded the moment I would**
