During its first half, Aurora: The Game is a bit of a hybrid between the Point and click adventure game, and the first-person shooter. In the second part of the game, Sami and Codi have problems with their ship, and the starting areas are separated, where it is necessary to run between them and make saves in the appropriate areas. The gameplay is similar to the previous chapters and requires you to use different weapons and items to defeat enemies: As your character grows you will be able to use different weapons and items that are available to you throughout the game. To break the game, you have to find the exit; when you do, the game will end. Sonic Adventure 2 is a game about Sonic, Tails, Knuckles, Amy, and Sonic the Hedgehog. As the story progresses you will travel across the globe to help everyone! You will interact with most of the original cast, including Nick, Shadow, Rouge the Bat, Big the Cat, and the Dog from Miles "Dead" City. In addition, you will find side characters like Aunt Vivian and Raphael. You have the ability to customize your characters by equipping different abilities to each character. Each ability has different uses, allowing you to have many different strategies to use. For example, a character may have the ability of great speed, allowing you to get where you need to go faster. This is where the customization comes in; you can equip abilities to each character as you see fit. The gameplay is one thing that makes Sonic Adventure 2 very unique. The gameplay is unlike most games because as your character comes across people, objects, and items, you will change the way you act within the game. To use an example of the gameplay, as Sonic the Hedgehog runs through someone, if he knocks the person over, he will flatten him. This happens, depending on what kind of person you are trying to knock over. For example, if you are trying to knock over someone who is fat, you will flatten him instead of what you were planning. The game is a very unique experience and a great adventure for all ages. While the title of the article might seem a little odd, the article was actually talking about the pending release of Nokia N9 and D600, both of which are smartphones, albeit from different companies. But Nokia also announced a partnership with Microsoft (who also released Nokia Lumia 800 and N8) to make mapping applications for Windows Phone 7 and Windows Phone 8 operating systems. The release of these apps will definitely make Microsoft's Windows Phone 8 a great smartphone Operating System. I'm sure, Microsoft has improved their phones with these apps as well. It's not surprising to see Microsoft doing all it can to make the Windows Phone 7 apps compatible for Windows Phone 8.
