I tried asking this question here and in the Snags group but was not able to get any response. So what is going wrong and how can i generate the xml file without using SN Write tool? A: As of now snags is only available in SnagIt 9.5.1 for Windows only. It is available in the Mac version but won't be compatible with all Macs. The SnagIt team is also not making the Mac version available for SnagIt Pro customers. Mac customers who are so inclined may, however, be able to activate the SnagIt Pro version on their Windows machines and then save the image.
