
50 Cent And G-Unit, Beg For Mercy Full Album Zip \\FREE\\

i'd like to see 50 cent (and the rest of g-unit) come back and make an album with someone who can write a song like 'tears of a clown,' but that's a discussion for another day. 'wanna get to know you' is the standout song, and the rest of the album is pretty solid. it was a critical and commercial success, and 50's dominance of rap at the time was cemented. he was the star of the show, and for a while it was pretty clear who was top dog, but 50 and lloyd were on a collision course. my favorite record on the album is the one with a heartfelt message of unity: 'get by'. my favorite song in the entire g-unit catalog is the first single, 'poppin' them thangs.' one of the best, most honest songs in the entire rap canon, and a reminder of how good 50 is. the only thing that could have made this album better would be some of those more in-depth songs 50 began recording on his own. 'tears of a clown', 'i get money', and 'my life' are among his best, but they only appeared on the albums b-sides. hopefully they will appear on the big picture. 50 cent and g-unit's debut beg for mercy, produced by dr. dre, p. diddy and dj quik, is the gift that keeps on giving. in the near future, we'll have eminem (at least when he's not busy struggling through mockingbird), dmx (if he ever does anything besides music), mos def (if he ever does anything besides music), and drake (if he ever does anything besides music). 50 cent and g-unit are at the forefront of hip-hop's current resurgence. it's no longer safe for the cool kids to hide under their bedsheets and wait for their parents to get home. 50 cent and g-unit are here, on the streets, kicking ass and taking names. their music can be a little rough around the edges, but that's to be expected when a rapper has g-unit and 50 cents in the name.

50 Cent And G-Unit, Beg For Mercy Full Album Zip

those who have never been exposed to gangster rap may find beg for mercy a bit difficult to follow. if you get in to it and pay attention, you'll find that 50 is a very good rapper. he's been compared to a number of greats, from nas to ice cube. and while he doesn't do anything new, his delivery is incredibly smooth

and easy to follow. the record has more of a west coast feel, with a lot of dope samples and the likes of timbaland, missy elliot, and even dr. dre. the real reason they hang out in barbershops, however, isn't to spend time with their peers and friends. their true purpose is to relax and work on their rhymes. the g-unit crew is one of the most successful and most influential in hip-hop, and every member of the

group has released at least one album. 50 cent has had the most success. the g-unit ringleader is 50 cent, or curtis jackson iii, and he is the one who brought the rest of the crew together, including his childhood friends lloyd banks and tony yayo. banks is the more mellow of the group, and he is the album's chief lyricist. he shows up with his smooth voice and his girlfriend vibe. young buck is a

dude who does his thing. he's more than just a hype man -- he's a battle rapper. he's a bit of a hustler, too. he's got a friend in jay z who helps him out. young buck has a gift for writing goofy rhymes, and on beg for mercy he even tries his hand at pop, while still tossing up wise-ass one-liners. the album opens up with a cover of jay-z's "can i get a..", which is a nice spot for 50 to prove that he's still got it. he

goes on to answer his own question with a few bars of his "in da club" and a little "made it" (which he later steals in "my own way"). now he's in the mood to ball, and he delivers a high-energy set of lyrics, which include the word "kush" which, as far as i know, doesn't mean anything in the context of rap. but he definitely wants you to believe it does. 5ec8ef588b
