Sialylation of the erythrocyte membrane and its relationship to blood group substances. The peripheral erythrocyte membranes were isolated from normal and blood group B antigen-bearing donors and analyzed for sialylation by means of the molar ratio of membrane-bound neuraminidase to the sialic acid content (N/S ratio). The N/S ratio was significantly greater in membrane samples of B antigen-bearing donors than in those of normal subjects. The increased N/S ratio is due to increased sialylation of the erythrocyte membrane. Therefore, the increased sialylation of the erythrocyte membrane from B antigen-bearing donors may provide a molecular basis for the B antigen. Review: The Right to Earn a Living by David Foreman As he advocates for better working conditions and fairer wages, David Foreman has been pegged an apologist for poverty-level wages and deplorable working conditions. Foreman, a professor at the University of Massachusetts, Amherst, and a long-time labor activist, explains the reasons behind a low-wage economy with admirable clarity in his new book, *The Right to Earn a Living*. Foreman's book is divided into seven sections: The Right to Work, the Right to the Basic Necessities of Life, the Right to Safe and Adequate Housing, the Right to a Healthy Work Environment, the Right to a Liveable Wage, the Right to Enjoy Liberty and Dignity, and the Right to Participate in the Economy. In each chapter Foreman makes the case that, in America, the working class has been systematically stripped of every basic right that previously afforded them some measure of dignity. These rights, Foreman argues, should be
