EASEUS Todo Backup Server is a Windows utility that performs backup and recovery of the operating system and data from different sources such as a floppy disk, USB storage device, CD/DVD media, FTP server, shared folders, hard disks, USB sticks, USB keys, etc. This allows for better safety of your important data. With the help of EASEUS Todo Backup Server you can manage the backup and recovery of different types of data, such as the operating system, data files, e-mails, disk partitions and system volumes. All data is protected by a backup schedule that enables you to specify the time and location of the backup operation and the frequency of the re-backups. EASEUS Todo Backup Server also offers options to create virtual disks, to clone and backup entire hard disks, as well as to perform a backup from a previous point in time. This way, if the operating system or one of the partitions on a disk crashes or malfunctions, you will be able to recover it without having to start all over from scratch. EASEUS Todo Backup Server also offers you the opportunity to test the integrity of the backup with the help of the built-in file integrity checker that allows you to verify the consistency of the data and folders you have chosen to backup. The software is designed to be very easy to use, since its interface is intuitive and there is very little text to be entered into it. All you need to do is select the backup device and the sources that you want to be included into the backup and choose the option that you want. The software then performs the backup operation and starts backing up data to the local disk. The backups are stored in the My Documents\EASEUS Todo Backup Server folder on the destination disk, where they can be accessed and viewed with the help of the built-in file explorer. You can then restore the data and create bootable disks with the virtualization tools included in the software. Product Overview EASEUS Todo Backup Server is designed to keep your computer and data safe. It can protect data on your hard disk, USB storage devices and CDs and DVDs. What's new Improvements EASEUS Todo Backup Server 1.32 may include unspecified updates, enhancements, or bug fixes. EASEUS Todo Backup Server is a backup software designed to keep your computer and data safe. It can protect data on your hard disk, USB storage devices and CDs and DVDs.
