The present invention relates to a binder composition suitable for making molded articles having excellent resistance to organic solvents, mechanical strength and heat resistance, and also relates to a molded article having excellent resistance to organic solvents, mechanical strength and heat resistance formed from this binder composition. Conventionally, there have been used, as a binder for manufacturing molded articles such as electric circuit boards or the like, a phenolic resin modified by a carboxyl group. In particular, a phenolic resin having an aromatic nucleus present in the molecule is excellent in electric resistance and heat resistance, and also has excellent mechanical strength.
